

Medical device integration and logistics support

DOD | DEFENSE HEALTH AGENCY (DHA)

MicroHealth is helping **ensure that medical devices within the National Capital Region (NCR) meet MHS GENESIS requirements** after initial site deployments discovered that many medical devices could not meet readiness and cyber requirements.

Once in place, these devices will transmit health data directly into the military's new Electronic Health Record (EHR).

**Let's do more,
together.**

Our Work in Action

Device Integration @ the DHA

SOFTWARE DEVELOPMENT | INTEGRATION | TESTING | EHR

MHS GENESIS SNAPSHOT

- When fully deployed, the military's new EHR will provide a single health record for service members, veterans, and their families and beneficiaries
- The Medical Device Systems Security Program Management Office was established to achieve effective medical device integration and lifecycle management for the NCR

THE WHAT

- Logistics program management support
- Facilitation of process improvement activities
- Develop a middleware solution that provides a resilient/redundant computer platform between the medical devices

THE WHY

- Ensure all NCR medical devices meet MHS GENESIS ready criteria and enable reliable and secure medical device integration
- Reduce patient safety risk
- Better healthcare outcomes
