

# Army MSTC software, hardware, and help desk support

ARMY | PEO SIMULATION, TRAINING, AND INSTRUMENTATION

MicroHealth provides **medical simulation training software development and integration to 25 MSTC sites** across the globe.

The MSTC Post-Deployment Software Support (PDSS) Lab creates the necessary closed space to ensure any changes maintain the integrity of the system. This includes assessing new immersive reality hardware, integrating new hardware, system changes, software updates, security updates, prototypes, and training course instruction.

**Let's do more, together.**

 **MicroHealth**

Our Work in Action

# Medical Simulation @ Army MSTCs

MEDICAL SIMULATION | IT SUPPORT | MODERNIZATION

## MSTC SNAPSHOT

- Provide realistic medical training to Active, Reserve, and National Guard soldiers
- 25 current and planned sites, globally
- Each site trains over 2,500 medical and non-medical (all combatants) Soldiers

## THE WHAT

- Site configurations and system changes
- Solutions development and enhancements
- Security management
- Training course instruction
- 24/7 help desk technical support

## THE WHY

- Supports direct instruction on the latest battle-field trauma and critical care techniques in a high-stress combat environment
- This complex system requires continual software updates and system development to ensure the baseline remains up to date with defense, technology, and security requirements
- **Better healthcare outcomes**
