

Integrated mobile medical simulation training, anywhere

MILITARY | POLICE | FIRE/RESCUE | DISASTER SIMULATION

The need for live simulation to replicate full-speed rehearsals remains crucial, particularly when it comes to field training in austere environments.

MicroHealth offers portable and adaptable solutions to recreate trainings in deployed environments.

Our solutions empower clients to overcome the limitations of fixed facilities and deliver immersive, realistic, and scalable training experiences that align with the evolving needs of modern simulation training.

Let's **do more,** together.

 **MicroHealth**

MicroHealth Solutions

Integrated Mobile Medical Simulation

MEDICAL SIMULATION | SOFTWARE INTEGRATION | TRAINING

SNAPSHOT

- Existing systems for controlling simulation peripherals, such as light, sound, and smoke, are often limited to large, fixed facilities
- MicroHealth's solutions offer portable and adaptable training alternatives

THE WHAT

- Mobile, portable medical simulation trainer at any location (fixed and austere)
- Cost efficiencies in portability of solutions and reach of training (point of need)
- Operates from a laptop platform

THE WHY

- Operates without the need for a fixed facility, significantly reducing costs and expanding the reach of simulation training
- Single interface for both simulator and simulation control (e.g., environmentals such as smoke, light, scent, sound)
- **Better healthcare outcomes**
